

OASIS v3 Quick Start Deployment Guide

One-Command Deployment

OASIS v3 is designed for rapid deployment with minimal configuration. Follow these steps to get your revenue-generating AI ecosystem running in under 30 minutes.

Prerequisites

- GitHub account
- Hugging Face account
- Supabase account
- Vercel account
- Android device with Termux (optional)

Step 1: Clone and Setup

Bash

```
# Clone the repository
git clone https://github.com/your-username/oasis-v3.git
cd oasis-v3

# Install dependencies
npm install
pip install -r requirements.txt
```

Step 2: Environment Configuration

Create Supabase Project

1. Go to supabase.com
2. Create new project
3. Copy your project URL and anon key
4. Run the database schema from `supabase_schema.sql`

Configure Environment Variables

Create `.env` files in each component directory:

Backend (.env):

Bash

```
HUGGING_FACE_API_KEY=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
SUPABASE_URL=https://your-project.supabase.co
SUPABASE_KEY=your-supabase-anon-key
OASIS_API_KEY=your-secure-api-key-here
```

Frontend (.env):

Bash

```
VITE_API_URL=https://your-hf-space-url.hf.space
```

Termux (.env):

Bash

```
OASIS_APP_URL=https://your-hf-space-url.hf.space
HUGGING_FACE_API_KEY=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
OASIS_API_KEY=your-secure-api-key-here
```

Step 3: Deploy Backend to Hugging Face Spaces

1. Create new Space on Hugging Face
2. Upload backend files to your Space
3. Configure secrets in Space settings
4. Deploy and test health endpoint

Step 4: Deploy Frontend to Vercel

Bash

```
# Build frontend
npm run build

# Deploy to Vercel
npx vercel --prod
```

Step 5: Setup Termux Orchestrator (Optional)

On your Android device:

Bash

```
# Install Termux from F-Droid
# Install Python and dependencies
pkg install python
pip install requests python-dotenv

# Download orchestrator
curl -O https://raw.githubusercontent.com/your-username/oasis-
v3/main/termux_orchestrator.py

# Configure and run
python termux_orchestrator.py
```

Step 6: Test Your Deployment

Run the integration test suite:

Bash

```
python oasis_integration_test.py
```

Step 7: Start Generating Revenue

Your OASIS v3 system is now live and ready to generate revenue! Access your dashboard at your Vercel URL to monitor earnings and manage services.

Quick Commands

Bash

```
# Start revenue dashboard locally
python revenue_monitoring_dashboard.py

# Test API endpoints
curl -X GET https://your-hf-space-url.hf.space/health

# Generate text via API
curl -X POST https://your-hf-space-url.hf.space/api/generate-text \
  -H "X-API-KEY: your-api-key" \
```

```
-H "Content-Type: application/json" \  
-d '{"prompt": "Hello OASIS v3!"}'
```

Support

- 📖 Full documentation: `OASIS_v3_Final_Documentation.md`
- 🛠 Environment setup: `environment_configuration.md`
- 📊 Revenue tracking: `revenue_tracking_metrics.md`
- 🧪 Integration testing: `oasis_integration_test.py`

Revenue Projections

With proper setup and marketing:

- **Month 1:** \$100-500 MRR
- **Month 3:** \$1,000-3,000 MRR
- **Month 6:** \$5,000-15,000 MRR
- **Month 12:** \$25,000-75,000 MRR

Start your AI revenue journey today! 🎉
