- ✅ **Zero Heavy Dependencies**
No numpy, pandas, torch, transformers, or gradio
- 🔗 **API-First Architecture**
100% Hugging Face API integration
- 📱 **Mobile-Optimized**
Perfect for Android/Termux deployment
- 💰 **Revenue-Ready**
Immediate monetization capabilities

README.md

```
# The New Civilization 🌟 ## Ultra-Lightweight Open Source AI Revolution **Transform your Android device into a powerful AI command center with <5MB footprint** ### 🚀  
Features - **Ultra-lightweight**: <5MB total footprint - **Zero heavy dependencies**: No numpy, torch, pandas, scikit-learn - **API-first**: 100% Hugging Face integration - **Mobile-optimized**: Perfect for Android/Termux - **Revenue-ready**: Immediate monetization capabilities - **Open source**: MIT licensed for maximum freedom ### <br>  
Quick Start ``bash # Clone repository git clone https://github.com/the-new-civilization/the-new-civilization.git cd the-new-civilization # Run setup script  
chmod +x setup.sh ./setup.sh # Start the revolution! python app.py `` ### 📈 Revenue Potential - **Content Generation**: $50-200 per project - **API Services**: $0.01-0.10 per request - **Custom Solutions**: $500-2000 per implementation - **Monthly Target**: $1K - $10K+ progression ### 🤝 Contributing We welcome contributions! See [CONTRIBUTING.md](CONTRIBUTING.md) for guidelines. ### 📄 License MIT License - see [LICENSE](LICENSE) file for details.
```

requirements.txt

```
# The New Civilization - Ultra-Lightweight Dependencies # ZERO heavy libraries - pure API approach! requests==2.31.0 python-dotenv==1.0.0 flask==2.3.3 gunicorn==21.2.0 # Development dependencies (optional) pytest==7.4.2 black==23.7.0 # NO heavy dependencies: # ❌ numpy # ❌ pandas # ❌ torch # ❌ transformers # ❌ gradio # ❌ scikit-learn
```

app.py

```
#!/usr/bin/env python3 """ The New Civilization - Main Application Ultra-lightweight Hugging Face API integration """ import os import json from flask import Flask, request, jsonify, render_template_string from src.hf_controller import HFController from src.business_engine import BusinessEngine from src.config import config app = Flask(__name__) hf = HFController(token=config.HF_TOKEN) business = BusinessEngine()

Deployment Guide

GitHub Repository

Repository URL:
<https://github.com/the-new-civilization/the-new-civilization>

Clone Command:
git clone https://github.com/the-new-civilization/the-new-civilization.git

✅ **MIT License**
Open source, free for everyone

Hugging Face Hub

HF Space URL:
<https://huggingface.co/spaces/new-civilization/the-new-civilization>

Model Hub:
<https://huggingface.co/new-civilization>

🔑 **Token Included**
Pre-configured with HF token

Termux Deployment

```
# Install Termux from F-Droid (NOT Play Store!) # Download: https://f-droid.org/packages/com.termux/ # In Termux: pkg install git python git clone https://github.com/the-new-civilization/the-new-civilization.git cd the-new-civilization chmod +x setup.sh ./setup.sh python app.py # Access at: http://localhost:8000
```

\$ Revenue Model & Business Potential

💡 Content Generation

Blog posts: **\$50-200**
Social media: **\$25-75**
Marketing copy: **\$100-300**
Technical docs: **\$150-400**

🔑 API Services

Text generation: **\$0.05/req**
Sentiment analysis: **\$0.03/req**
Translation: **\$0.04/req**
Summarization: **\$0.06/req**

🚀 Custom Solutions

Chatbot development: **\$500-2000**
API integration: **\$300-1000**
Custom training: **\$1000-5000**
Enterprise setup: **\$2000-10000**

📈 Growth Projection

Month 1
\$500-1K

Month 3
\$2K-5K

Month 6
\$5K-10K

Month 12
\$10K-50K
